NOTICE OF MORATORIUM

At its' meeting of December 20, 2007, the North Andover Board of Health voted unanimously to issue a MORATORIUM on the installation of wood burning furnaces. Said moratorium has the force of regulation and was adopted under the authority of M.G.L.c. 111, § 31.

In doing so, the Board is concerned that the smoke generated by wood burning furnaces potentially creates a public health nuisance worthy of regulation due to the particulate matter created by the furnaces, unpleasant odors, and the general air pollution associated with burning. Said moratorium shall remain in effect until such time as the Board rescinds that decision or enacts specific regulation.
